

DIEGO BELTRAN

📍 Chetumal, Quintana Roo, MX · 8123110123@utchetumal.edu.mx · +52 983 157 2802 · LinkedIn · GitHub

Summary

Software development student with a strong foundation in backend architecture, scalable SPA design, and database optimization. Proven track record in delivering secure web applications and contributing to academic research. Recognized for combining technical expertise with strategic problem-solving in real-world environments.

Education

Technological University of Chetumal

GPA: 9.7/10

Higher Univ. Technician (Jun 2025) & Bachelor's in Software Development (Dec 2026)

Languages: Spanish (Native), English (B2 Upper Intermediate)

Full Stack Developer Intern

Asesores Gubernamentales Digitales Tech

Jan 2026 – Present

- Engineered a scalable Role-Based Access Control (RBAC) engine to support a modern SPA migration (Laravel 12 / Vue 3), replacing inefficient queries with bulk database operations to significantly improve permission assignment performance.
- Secured over 100 API and web endpoints by designing a centralized middleware, standardizing access control and eliminating redirect errors across both standard and Inertia.js requests.
- Built a dynamic permission management interface using PrimeVue, leveraging global state to simplify frontend logic and improve code maintainability across the application.

Computer Vision Research Assistant

ECOSUR

Apr 2025 – Jul 2025

- Built Python OOP library (OpenCV, NumPy) for area estimation with 99% accuracy in environmental monitoring.
- Refactored 1600+ lines into 6 modular classes, improving maintainability and reusability.
- Designed and executed experiments for marker-based calibration; supported ongoing PhD research.

Sojal Reporting System & DevOps

UT Chetumal

Apr 2024 – Apr 2025

- Developed 7 interconnected CRUD systems (users, trucks, routes) with Laravel MVC & Livewire.
- Migrated relational DB to MongoDB, reducing schema complexity by 40% and improving query performance.
- Deployed backend on Ubuntu VM with Apache, implemented monitoring tools for uptime and performance.

Honors & Awards

1st Place – Highest Generation GPA (9.7/10.0)

Jan 2026

Awarded 1st place in the graduating class generation for outstanding academic excellence.

1st Place – Best Internship Project Competition

Aug 2025

Recognized among 40+ students for outstanding computer vision research and software development.

Technical Skills

Languages: Python, PHP, JavaScript, SQL, HTML/CSS

Frameworks/Tools: Laravel, Vue.js, Inertia.js, React, PrimeVue, Bootstrap, Git, Linux

Databases: MongoDB, MySQL

Computer Vision: OpenCV, NumPy, Pandas, Matplotlib, cv2.aruco
